Priority: <i>High</i>	Time Estimate: <i>Theme</i>	Card Deck: <i>Y</i>
Story Title: <i>Usability</i>		
User Story description: As a < inexperienced user> want to < use the application with relative ease> so that I can < learn and use the software even by myself to achieve the goals I have>		
What needs to be done/working when user story can be considered done: - user (not necessarily admin) interface should be intuitive - enough instruction should be provided for the user in the form of e.g. tooltips

Project week No.: 2	Date: <i>2020-01-21</i>	
Priority: <i>Medium</i>	Time Estimate: <i>Theme</i>	Card Deck: <i>Y</i>
Story Title: <i>Portability</i>		
User Story description: As a < average user> want to < use the application with the software I already have available> so that I can < avoid acquiring software I don't want>		
What needs to be done/working when user story can be considered done: - <i>application should work on most common web browsers (Chrome, Firefox, Edge) and operating systems (Windows 10, MacOS, Linux), possibly on mobile (Android, iOS) too.</i>

Theme

Card Deck: *Y*

Story Title: *Performance*

User Story description:

As a < user with mid-low-tier hardware >

want to < have near immediate feedback from my actions on the application >

so that I can < enjoy using the application and not waste time waiting and getting frustrated >

What needs to be done/working when user story can

be considered done: - *application should respond to user actions in under five seconds, even on devices with somewhat limited computing power*
