Team Name / Number: *BeeWare / 16*

Project week No.: *1*	Date: *18.01.2021*	
Priority: *High*	Time Estimate: *Epic*	Card Deck: *Y*

Story Title: *What's it all about*

User Story description:

As a *< bee>*

want to *< build and maintain a hive with my bros and sis' in a suitable environment>*

so that I can *< produce that sweet sweet honey, pollinate the plants etc., do everything the bees do>*

What needs to be done/working when user story can be considered done: *- app's users should be able to make location recommendations for hives and the recommendations can be acted upon*

- app must be reachable for real world users

Team Name / Number: *BeeWare / 16*

Project week No.: 1	**Date:** *16.01.2021*

Priority: *Medium*	**Time Estimate:** *Theme*	**Card Deck:** *Y*

Story Title: *Being Beeings business partner*

User Story description:

As a *< business partner >*

want to *< tell others about Beeings >*

so that I can *< have more business partners myself>*

What needs to be done/working when user story can be considered done: -

- location sharing system implemented

- recommendation system implemented

- the system should be improved so, that Beeings as a company can grow

Team Name / Number:	BeeWare / Team 16	

Project week No.: 1	Date: 16.01.2021	

Priority: **High**	Time Estimate: Epic	Card Deck: Y

Story Title: *Do not spam!*

User Story description:

As a *< E-mail Receiver>*

want to *< not be spammed by a lot of E-Mails regarding the same content>*

so that I can *< have an overview about my E-mails and make a better decision about what to >*

What needs to be done/working when user story can be considered done: *-- E-Mail-Thresholding regarding a location (when two diff. persons recommend same person => redundancy)*

- Saving data [location, UID, recommended Person/company]

- UID needs to be generated => combination of IP-address, Session-ID, ...

- Generell UID-tracking for preventing reflection or amplification attacks against target (malicious)

Priority: *Medium*	Time Estimate: *Epic*	Card Deck: Y

Story Title: *Appropriate Bee-Village data?*

User Story description:

As a *< Beeings Admin>*

want to *< have enough information about the location recommendation and the people behind>*

so that I can *< validate whether the bee-village input data is valid or not and the recommendation can be put into action>*

What needs to be done/working when user story can be considered done: *- - Admin page with necessary informations*

- (preprocessing) backend validation whether input data for bee-village (location, recommended person, etc.) is correct

- database to save information

Team Name / Number:	BeeWare / Team 16	

Project week No.: 1	Date: 16.01.2021	

Priority: *Medium*	Time Estimate: *Theme*	Card Deck: Y

Story Title: *E-Mail Marketing consensus*

User Story description:

As a *< E-mail owner>*

want to *< receive a confirmation regarding my data being saved in a marketing DB>*

so that I can *< decide whether my privacy shall be uphold or not>*

What needs to be done/working when user story can be considered done: *-- confirmation request through e-mail, which needs to be verified before the data gets transmitted to the E-mail marketing platform*

- create unique confirmation link with time limit

- save (confirmation link, e-mail, time, status) in database for future legal cases

Project week No.: _1_	**Date:** _16.01.2021_		

Priority: _Low_	**Time Estimate:** _Theme_	**Card Deck:** _Y_

Story Title: _Beeings - what is that?_

User Story description:

As a _< person who got recommended >_

want to _< get more information about Beeings and maybe get in touch with Beeings >_

so that I can _< get to know why I was recommended and if I can really get a beehive on my backyard>_

What needs to be done/working when user story can be considered done: _-- E-mail template_

- Show suggested location on map

- Recommendation info stored in database and accessible to admins
